## Support for Life

*We devote all our energy to conserve and maintain life through the sustained efforts of medical and nursing care.*

There is no distinction between the life of the person with or without disability. We keep on looking at precious lives as a person to support life, not only from a sense of responsibility.

## Health Promotion

## Creating a Good Environment

*Improving a living environment to create a clean, lively and delightful place for treatment and education life*

We put a top priority on taking care of the environment as a secure place to live. From there a friendly atmosphere builds up and lively, delightful daily life has been nurtured.
